Quote # 23608

March 2, 2010

Thank you for the opportunity to provide you with a quote. We have established a pricing structure for your organization as follows:

DNA Sequencing Price:

\$10.00 per reaction

\$400.00 per plate – 96-well format

No Expiration Date

Shipping:

\$10.00 shipping credit for 10 or more samples
(Please indicate on order form)

Sequencing Turnaround:

24 hours

Sequencing Order Forms:

http://www.retrogen.com/index/dloadorder_form2.htm

Submission Template Requirement:

http://www.retrogen.com/index/submission_template2.htm

The benefits of getting your sequencing projects done with our latest technology in capillary sequencing:

- ◆ Highest quality sequencing data - up to 1100 bases per reaction
- ◆ Longest reads allow you to finish your project more quickly with fewer custom primers and reactions
- ◆ Fully automated sample loading and data tracking
- ◆ Consistent data from every sequencing run
- ◆ Maximum sensitivity with less amount of template
- ◆ Fast turnaround service with sequence data delivered within 24-48 hours
- ◆ High throughput capacity with more than 20,000 reactions per week
- ◆ Get professional consultation from our highly experienced genomics staff
