QUOTE OF THE MONTH

Reading is to the mind what
exercise is to the body.

Joseph Addison

INSTRUCTIONAL TRAINING CLASSES

FREE hands-on computer classes are held in the Library's Microcomputer Lab throughout the year. A flyer announcing our FALL classes is included in this newsletter. To see a complete list of classes with descriptions, please check our web site at URL <http://www-library.ncifcrf.gov/libclass.asp>

Upcoming classes include:

Introduction to EndNote: Tuesday, September 2, 2003 2:00 p.m. – 4:30 p.m.

Intermediate EndNote: Tuesday, September 9, 2003 2:00 p.m. – 4:30 p.m.

Reference Manager Overview: Tuesday, September 23, 2003 2:00 p.m. – 4:00 p.m.

Electronic Databases Overview: Tuesday, October 7, 2003 1:00 p.m. – 4:00 p.m.
(This is a 3-hour class.)

If you are interested in attending any of these free classes, please call x5840, or email meckley@mail.ncifcrf.gov

The Library offers other types of training, including **Web Tutorials** and **Video-based Training**. For complete information, please see "Library Training" on our web site at URL <http://www-library.ncifcrf.gov>

LIBRARY ORIENTATIONS

Library Orientations are usually held the second Wednesday of each month, **beginning at 2:30 p.m.** September's Orientation will be held on **Wednesday, September 10**, and October's Orientation will be held on **Wednesday, October 8**. Orientations are held in the Library's Microcomputer Lab. No prior registration is required.

We encourage all new employees to attend to learn more about the Library's services, and to see demonstrations of the Library's Home Page and online catalog. If you are unable to attend any of these sessions, please call x5840 to schedule an alternate session.

LIBRARY	Main Number	846-1093	LIBRARY HOURS	
	Circulation Desk	846-5848	Monday - Thursday	8:30 - 9:00
	Computer Searches	846-5840	Friday	8:30 - 7:00
	Interlibrary Loan	846-5842	Saturday	10:00 - 5:00
	Reference	846-1682	Sunday	11:00 - 5:00

Visit the Library's Home Page at <http://www-library.ncifcrf.gov>

“TAKE YOUR CHILD TO WORK” DAY

On Wednesday, July 23, the staff of the Scientific Library enjoyed an exciting “Take Your Child to Work” day. Approximately 24 children and 19 adults enjoyed our “How Does It Do That?” program.

As the children entered the Library on this special day, they received their own personalized lab coats, in which they posed for digital pictures snapped by Library staff members. Then, they walked through the Inventor’s Workshop on their way to the Microcomputer Lab.

While in the Lab, the children and their parents used their computer skills to find out how a yo-yo works, why bubbles pop, and what makes popcorn pop. They even had a chance to create their own web kaleidoscopes! As the program ended and the children exited the Lab, they received additional souvenirs, a digital picture, and a freshly popped bag of popcorn!

If you and your children were unable to participate in this program on July 23, you can still enjoy the Library’s “How Does It Do That?” web site by pointing your browser to URL [http://www-library.ncifcrf.gov/children/childday03/child03.html](http://www.library.ncifcrf.gov/children/childday03/child03.html)! To print out the questions, click on “Text Version.”

“HOUSEHOLD PRODUCTS DATABASE” NEW FROM NLM

NLM has launched another new database, the **Household Products Database**, to provide easy-to-understand information on the potential health effects of more than 2,000 ingredients contained in more than 4,000 common household products. The database links these products to information from the Material Safety Data Sheets (MSDS) provided by the manufacturers. Users may browse by product categories, product brand names, and product manufacturers, as well as search ingredients by their chemical names or CAS numbers. The database is designed to help answer questions such as what chemical ingredients and their percentages are in certain brands; which products contain specific chemical ingredients; who manufactures a specific brand and how to contact the manufacturer; and the health effects caused by exposure to chemical ingredients in a specific brand. Visit NLM’s new database at the URL <http://hpd.nlm.nih.gov/>.

Tox Town, another of the new NLM consumer databases -- an interactive guide to commonly encountered toxic substances -- has recently been enhanced with a new City scene. You may visit the City at <http://toxtown.nlm.nih.gov/city/main.html> for an urban perspective on environmental health concerns in locations such as airplanes and air travel, brownfields, construction sites, electromagnetic fields, and a hospital with an interior view.

ISI ANNOUNCES "HOTTEST" JOURNALS OF THE DECADE

If you had to guess which scientific journal would top the Institute for Scientific Information (ISI) list of high-impact journals for the years 1992 – 2002, what would it be? Number 10 on the list in the Molecular Biology & Genetics section is **PNAS**. To see the entire list, visit <http://www.isinet.com/presentrep/pdf/sfx936.pdf> for the complete story, criteria, and lists of rankings in each field.

NEW BOOK ADDED TO NCBI BOOKSHELF

The KIR Gene Cluster, by Mary Carrington and Paul Norman, (2003) has just been added to the NCBI Bookshelf, which may be searched directly from the Bookshelf site or via links from the Links pull-down menu from relevant PubMed citations. Dr. Mary Carrington is a scientist in the Basic Research Program, SAIC, NCI-Frederick. See this book and others in the Bookshelf Collection, at the Bookshelf site, <http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=Books>

ONLINE JOURNALS UPDATE

Bentham Publishers [<http://www.bentham.com>] is offering free online access **through 2003** to all online **Bentham** titles via *ingenta* for the years 2000, 2001, and the first 6 months of 2002. Use **bentham.online** as "user name" and **1234567** as "password." Titles include **Current Molecular Medicine, Current Pharmaceutical Design, Current Pharmaceutical Biotechnology**, and more.

See the list of new titles added to the Library's list of Online Journals on the Online Journals News at <http://www-library.ncifcrf.gov/onlinenews.asp>. We are pleased to announce that the HHS Libraries Consortium has secured some shared online subscriptions from Nature Publishing Group. As NCI-Frederick is a member of this consortium, these titles were added in the July update.

We have sent in our 2004 list of journal subscriptions (both print and online). We want you to know how much we appreciate the valuable feedback you gave us and to keep in mind that your recommendations are always welcome.

“SCIENCE IN THE CINEMA” BIBLIOGRAPHIES

When the Scientific Library offers a “Science in the Cinema” program, we always create a bibliography, which is printed and distributed at the program. It is also adapted to the web, complete with web links, and placed on our web site. We plan to publish these bibliographies in upcoming newsletters. You can also find all the bibliographies for past “Science in the Cinema” programs on our “Bibliographies” web page at URL <http://www-library.ncifcrf.gov/bibliographies.asp> or our “Science in the Cinema” web page at URL <http://www-library.ncifcrf.gov/science-cinema.asp>

In this newsletter you will find the bibliography to our most recent “Science in the Cinema” program, **WIT**. **WIT** tells the emotional story of a college professor who is forced to reassess her life when she is diagnosed with terminal ovarian cancer. The bibliography provides web addresses to pertinent ovarian cancer web sites, as well as materials about ovarian cancer that are available from the Scientific Library.

Ms. Kathleen “Kitty” Nalewaik, Nurse Practitioner with Occupational Health Services, was our speaker for **WIT**. During her talk following the movie, Kitty provided the audience with important information about ovarian cancer, including diagnosis and treatment, and offered additional relevant resources about this topic. These resources are listed below. As with all “Science in the Cinema” programs, the videotape of the movie and the videotape of Kitty’s informative talk are available at the Scientific Library. Kitty also invites any interested readers desiring more information about ovarian cancer to contact her at Occupational Health Services, x1096.

Additional Ovarian Cancer Resources Provided by Kitty Nalewaik:

1. Clinical Trials - <http://clinicaltrials.gov>
2. Cure - <http://www.curetoday.com>;
1-800-422-6237
3. Clinical Studies Support Center -

4. Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins –
<http://www.hopkinskimmeltcancercenter.org>;
contact Judy Bacon: 410-955-8964
5. Lombardi Cancer Center at Georgetown -
<http://lombardi.georgetown.edu>;
202-444-4000; Clinical Trial to screen participants who are at high genetic risk for ovarian cancer
6. Washington Hospital Center -
<http://www.whcenter.org>; contact Natalie Bongiorno: 202-877-8517; Phase III Clinical Trial for ovarian cancer (ovarex)

SITES FROM THE WEB

The following selected sites have come to our attention via various sources; their inclusion on our Web site does not indicate endorsement by Library staff. Links to these sites can be found in the Web Resources section of our web site under the category noted in each listing. Visit the Library's Home Page at

<http://www.library.ncifcrf.gov>.

BIO.com – Life on the Net

<http://www.bio.com>

This commercial, but open, site aims to create a distributed, online community of scientists, professionals, businesses and organizations supporting the life sciences for the purpose of facilitating communications and disseminating information within that community. Their editorial focus is on the technology of the life sciences, publishing daily news, information and research tools for life science professionals and students.

Digital Book Index

<http://www.digitalbookindex.com/about.htm>

The **Digital Book Index** provides access to more than 73,000 titles. The index gathers both **commercial** and **non-commercial** online Books from more than 1800 publishers and private publishing organizations. Titles can be found in most major disciplines—Literature, History, Science and the History of Science, Social Science, Medicine, the Arts, Religion, and various Area Studies (Native Americans, Afro-Americans, Women's Studies), etc. A Reference section includes over 2000 Dictionaries, Encyclopedias, Thesauri, Glossaries, Bibliographies, Timelines, Chronologies, Literary Histories, and includes a section on Writing & Style Guides. More than 25,000 titles from public archives—all indexed here—are available free, while many others are available at a cost. Thousands more contemporary titles, ranging from the Nancy Drew mysteries to Star Trek, Ernest Hemingway or John Le Carré, are available from many leading publishers.

HHMIs Biointeractive

<http://www.biointeractive.org>

From the Howard Hughes Medical Institute, this site offers a variety of interactive learning features, along with background materials, glossaries, and teaching tips. The site features virtual laboratories, animations, and interactive exhibits on topics such as biological clocks and cardiovascular disease.

Pan American Health Organization (PAHO)

<http://www.paho.org>

The mission of the PAHO is to strengthen national and local health systems and improve the health of the peoples of the Americas, in collaboration with Ministries of Health, other government and international agencies, nongovernmental organizations, universities, social security agencies, community groups, and many others. PAHO promotes primary health care strategies, which reach people in their communities, to extend health services to all and to increase efficiency in the use of scarce resources. It assists countries in fighting old diseases that have re-emerged, such as cholera, dengue and tuberculosis, and new diseases such as the spreading AIDS epidemic, providing technical cooperation including education and social communications support, promoting work with non-governmental organizations, and support for programs to prevent transmission of communicable diseases. The Organization is also involved in prevention of chronic diseases such as diabetes and cancer, which are increasingly affecting the populations of developing countries in the Americas. PAHO is based in Washington, D.C., with scientific and technical experts at its headquarters, in its 27 country offices, and its eight scientific centers.

RETRACTIONS OF PUBLICATIONS

The staff of the Scientific Library provides this service to alert our readers to any journal articles that are being retracted by the authors. Often, research that is undertaken to support the ideas in journal articles is questioned by other scientists. If the original authors then publish a formal retraction of all or parts of the original article, MEDLINE indexes that new article as "RETRACTION OF PUBLICATION" in the "publications type" field.

When a new retraction appears in MEDLINE, and subsequently in our newsletter, staff members type alerts that are permanently attached to the original articles. In this way, if a scientist is reading the original article, he/she will immediately be aware of the published retraction, and will be able to easily locate it in the journal collection.

Training Classes for FALL 2003

The staff of the Scientific Library offers **FREE** hands-on training classes in our Microcomputer Lab. Listed below is the schedule for September through November 2003.

If you are interested in attending a class, please call x5840, or stop in the Library, to register.

For more information about a class, please check the *Library Classes* web page at URL:

<http://www-library.ncifcrf.gov/libclass.asp>

Tuesday, September 2, 2003 <u>Introduction to EndNote</u> 2:00 p.m. – 4:30 p.m.	Tuesday, September 9, 2003 <u>Intermediate EndNote</u> 2:00 p.m. – 4:30 p.m.
Tuesday, September 23, 2003 <u>Reference Manager Overview</u> 2:00 p.m. – 4:00 p.m.	Tuesday, October 7, 2003 <u>Electronic Databases Overview</u> 1:00 p.m. – 4:00 p.m. (This class runs 3 hours.)
Tuesday, October 14, 2003 <u>Introduction to PubMed & NLM Gateway</u> 2:00 p.m. – 4:00 p.m. (English version)	Tuesday, October 21, 2003 <u>Introduction to Web of Science/PORPOISE</u> 2:00 p.m. – 4:00 p.m.
Tuesday, October 28, 2003 <u>Introduction to PubMed & NLM Gateway</u> 2:00 p.m. – 4:00 p.m. (Mandarin Chinese version)	Tuesday, November 4, 2003 <u>Staying Current with the Literature</u> 2:00 p.m. – 4:00 p.m.
Tuesday, November 18, 2003 <u>Introduction to EndNote</u> 2:00 p.m. – 4:30 p.m.	Tuesday, November 25, 2003 <u>Intermediate EndNote</u> 2:00 p.m. – 4:30 p.m.

Current Topics in Genome Analysis

The "**Current Topics in Genome Analysis**" course will be teleconferenced to NCI-Frederick from the NIH campus, beginning Tuesday, September 2, 2003. The 13-week program will be held in **Conference Room B of the Conference Center in Building 549, on Tuesday mornings from 10:00 - 11:30 a.m.** The one **exception** to this schedule is **November 4**, when the teleconference will be held in the **Executive Board Room of the Conference Center.**

The Library will provide copies of the handouts each week, or you can access the handouts from the web site at URL: <http://www.genome.gov/COURSE2003>

The weekly topics and speakers are listed below.

September 2

Techniques for Genome Mapping and Sequencing

Dr. Eric Green, NHGRI

September 9

Overview of NCBI Resources

Dr. Medha Bhagwat, NCBI

September 16

Mining Genomic Sequence Data

Dr. Tyra Wolfsberg, NHGRI

September 23

Nucleotide and Protein Sequence Analysis I

Dr. Andy Baxevanis, NHGRI

September 30

Nucleotide and Protein Sequence Analysis II

Dr. Andy Baxevanis, NHGRI

October 7

Protein Structure Analysis and Protein-Protein Interactions

Dr. David Wishart, University of Alberta

October 14

Comparative Genomics I: Laboratory Techniques

Dr. Roger Reeves, Johns Hopkins University School of Medicine

October 21

Comparative Genomics II: Computational Techniques

Dr. Elliott Margulies, NHGRI

October 28

Phylogenetic Analysis

Dr. Fiona Brinkman, Simon Fraser University

November 4 - NOTE: Teleconference in Executive Board Room

Microarray Analysis

Dr. Paul Meltzer, NHGRI

November 11

No Lecture

November 18

No Lecture

November 25

Studying Genetic Variation I: Laboratory Techniques

Dr. Karen Mohlke, NHGRI

December 2

Studying Genetic Variation II: Computational Techniques

Dr. Jim Mullikin, NHGRI

December 9

Strategies for Disease Gene Identification

Dr. Dennis Drayna, NIDCD
