QUOTE OF THE MONTH

What we become depends on what we read after all of the professors have finished with us. The greatest university of all is a collection of books.

Thomas Carlyle

LIBRARY ORIENTATIONS

Library Orientations are held every month in the Library's Microcomputer Lab. February's Orientation will be held on **Wednesday, February 11, beginning at 2:30 p.m.** March's Orientation will be held on **Tuesday, March 16, beginning at 10:00 a.m.** No registration is required to attend any Orientation.

We encourage all new employees to attend to learn more about the Library's services, and to see demonstrations of the Library's Home Page and online catalog. If you are unable to attend any of these sessions, please call x5840 to schedule an alternate session.

INSTRUCTIONAL TRAINING CLASSES

FREE hands-on computer classes are held in the Library's Microcomputer Lab throughout the year. We will begin a new session of classes in February. To see a complete list of classes with descriptions, please check our web site at URL <http://www-library.ncifcrf.gov/libclass.asp>

The Library also offers other types of training, including **Web Tutorials** and **Video-based Training**. For complete information, please see "Library Training" on our web site at URL <http://www-library.ncifcrf.gov>

LIBRARY	Main Number	846-1093
	Circulation Desk	846-5848
	Computer Searches	846-5840
	Interlibrary Loan	846-5842
	Reference	846-1682

LIBRARY HOURS	
Monday - Thursday	8:30AM - 9:00PM
Friday	8:30AM - 7:00PM
Saturday	10:00AM - 5:00PM
Sunday	11:00AM - 5:00PM

Visit the Library's Home Page at <http://www-library.ncifcrf.gov>

NCBI PERSONAL CONSULTATIONS

A staff member from the National Center for Biotechnology Information (NCBI) will visit the NCI-Frederick campus in February to offer Personal Consultations to interested personnel. A one-hour Personal Consultation provides each attendee with an opportunity for a one-on-one discussion about a specific NCBI-related topic of his or her choice. All Consultations are held in the Scientific Library's Microcomputer Lab, which permits hands-on access to the NCBI web databases, such as GenBank and BLAST.

The next NCBI Personal Consultation Day is scheduled for Monday, February 9. One-hour sessions begin at 9:00 a.m., with the final session beginning at 4:00 p.m. You must register to attend an NCBI Personal Consultation. If you are interested, please contact the Instructional Resources Librarian at x5840, or email meckley@mail.ncifcrf.gov. For more information about the National Center for Biotechnology Information, please see the web site at URL <http://www.ncbi.nlm.nih.gov>.

Back By Popular Demand!

SPECIALIZED NCBI CLASSES

Last October the Scientific Library hosted a specialized NCBI class entitled **Making Sense of DNA and Protein Sequences**. That class was so popular that we are hosting 3 more specialized NCBI classes in January: **BLAST Quick Start**, **LocusLink Quick Start**, and **Structure Analysis Quick Start**. Dr. Medha Bhagwat from NCBI is providing this excellent training. We hope to continue offering these classes throughout the year. For more information, please call x5840, or email meckley@mail.ncifcrf.gov.

ELSEVIER CLOSING BIOMEDNET & CHEMWEB

Elsevier Science has decided to close 3 in-house end-user portals, noting that the benefits do not justify the high investments required. Among the affected portals are **BioMedNet** and **ChemWeb**. Membership in the portals was free, although users were required to register, and access to full-text items required pay-per-view retrieval if unavailable via one's institution. It is planned to move some of the portals' current activities to the main Elsevier.com site.

FEDERAL FY2004 R&D BUDGET FOR KEY AGENCIES

If you have an interest in budget appropriations, you may wish to read AAAS' commentary regarding FY2004 R&D appropriations for key agencies at the AAAS Web Site, http://www.aaas.org/spp/cstc/news/articles2003/031219_agencies.shtml. The official "Nation's Investment in Cancer Research for Fiscal Year 2004: Plans & Priorities for Cancer Research," can be viewed at the URL <http://plan.cancer.gov/>.

PDA TRAINING

The Scientific Library is pleased to announce another opportunity for NCI-Frederick personnel to learn how to use a PDA (Portable Digital Assistant). A trainer from the Southeastern/Atlantic Region of the National Network of Libraries of Medicine will be teaching a 4-hour introductory session in February.

The class will be held on Thursday, February 5, from 12:30 p.m. – 4:30 p.m. in the Executive Board Room of the Conference Center in Building 549.

CLASS DESCRIPTION:

Portable Digital Assistants - Your Mobile Future

4 hours, hands-on class PDAs provided for in-class use for 12 students. Other students may bring their own PDAs to the class.

This course is an overview and introduction to handheld computing. It is intended for novices with little or no experience with handheld computing. The course will discuss topics that will be relevant when using the Palm and/or Pocket PC operating systems. The course will cover topics like data entry with handwriting recognition systems, using the calendar and "to do" lists to stay focused on short and long-term goals. Health care applications will be reviewed and discussed in small groups. The hands-on portion of the course will use the Palm operating system and participants will enter data and use various Palm applications to increase their comfort level and basic knowledge of this exciting technology.

Registration is required to attend this class. To register, please contact the Instructional Resources Librarian at x5840, or email meckley@mail.ncifcrf.gov. Please be sure to clarify if you need to use the instructor's PDA or if you will bring your own PDA.

SITES FROM THE WEB

The following selected sites have come to our attention via various sources; their inclusion on our Web site does not indicate endorsement by Library staff. Links to these sites can be found under "Web Resources" in the **Electronic Resources** section of our web site under the category noted in each listing. Visit the Library's Home Page at <http://www-library.ncifcrf.gov>.

Biocomplexity Thesaurus

<http://thesaurus.nbi.gov>

Developed in 2003 by Cambridge Scientific Abstracts (CSA) and the National Biological Information Infrastructure (NBII), this searchable Web resource is a merger of 5 scientific thesauri - Life Sciences, Aquatic Sciences & Fisheries, Pollution, Sociological, and CERES/NBII. [Biomedical]

Grants.gov

<http://grants.gov>

Allows organizations to find and apply for competitive grant opportunities from all Federal grant-making agencies as well as access useful grants-related information. [Grants]

Information Biotechnology – I-Bio UK

<http://www.i-bio.gov.uk>

To access a wide range of information on UK biotechnology, visit "I-Bio UK". A section called Absolute Beginners offers an introduction to the field while other sections include information about the biotech industry, academic research, current government policy and support initiatives for biotechnology and ancillary forms of research. [Biomedical]

Worm Atlas

<http://wormatlas.org/>

Funded by a grant from the National Institutes of Health Division of Research Resources for the Center for Anatomical Studies of the worm *C. elegans*, one of the most well studied worms from many different biological perspectives. Includes features such as the "Sliding Worm" with background information and links to external resources. [Biomedical]

WHAT IS "OPEN ACCESS PUBLISHING"?

The Open Access concept has been gaining momentum, most notably driven by the recent tendency of some publishers to design prohibitive pricing models for consortia to purchase their journals. At present, Cornell, Harvard, North Carolina Libraries Network, and possibly the University of California Library System, have refused to accept Elsevier's pricing model for consortium access, and are opting to subscribe to titles on an individual basis. [We are fortunate that the NIH Libraries Consortium has been able to negotiate a contract for us.]

Open Access to scientific and medical literature allows anyone, anywhere, with a connection to the Web, to find and read research articles online, and to use their contents for purposes of scholarly research, teaching, and personal inquiry. With open access, published material is archived in a public digital repository (such as **PubMed Central (PMC)**), which allows convenient access to content via sophisticated searching tools. By storing literature in a public repository, the public is ensured of not only the long-term preservation of the literature, but also a freely accessible resource.

Open Access Publishing: **BioMed Central (BMC)** and the **Public Library of Science (PLOS)** are two such organizations that are encouraging scientists and educators to publish in Open Access journals, bypassing established publishers of high-cost titles. The **PLOS** initiative began as a protest against the cost of traditional journals and the fact that so few are freely available on the **PubMed Central** server. The group first called for an author's boycott of these journals and over 30,000 scientists agreed. The boycott has met with limited success, but **PLOS** has recently received funding to launch its own open access journals (e.g. **PLOS Biology**). Submissions to **BioMed Central** open access journals have been increasing. **BMC** is funding its publishing business through Article Processing Fees (i.e., page charges) and also makes agreements with institutions that pay a modest sum to allow their employees to publish in **BMC** journals at no charge. NIH has such an agreement, so that any scientist at NCI-Frederick (and other NIH sites) can publish in the freely available **BMC** journals, thus broadening exposure to their research.

- **BioMed Central (BMC)**

<http://www.biomedcentral.com>

BioMed Central is an independent publishing house committed to providing immediate free access to peer-reviewed biomedical research

- **Public Library of Science (PLOS)**

<http://www.plos.org>

The Public Library of Science (PLOS) is a non-profit organization of scientists and physicians committed to making the world's scientific and medical literature a freely available public resource.

Open Access Journals are those that use a funding model that does not charge readers or their institutions for access. From the [BOAI, Budapest Open Access Initiative](#), definition of "Open Access," the right of "users to read, download, copy, distribute, print, search, or link to the full texts of these articles" is mandatory for a journal to be considered an Open Access Journal. In addition, such a journal should exercise quality control on submitted papers through an editor, editorial board and/or a peer-review system.

- **Directory of Open Access Journals**

<http://www.doaj.org>

The service covers free, full-text, quality controlled scientific and scholarly journals in many subjects and languages. Currently, this growing, searchable database includes **694** journals.

- **PubMed Central**

<http://pubmedcentral.nih.gov>

PubMed Central (PMC) is the U.S. National Library of Medicine's digital archive of life sciences journal literature. Access to PMC is free and unrestricted. Also, read about how NLM is [scanning the back issues](#) of PMC journals and making these digitized copies available in PMC. You may browse by title or search the journal of your choice.

NEW! Databases

PROTEOME BIOKNOWLEDGE LIBRARY from Incyte, Inc., is available to all local NIH researchers including NCI-Frederick and includes a collection of web-based databases of protein information from mammalian and model organism genomes. Currently, available databases include *Human PSD*, *GPCR-CD*, *YPD*, *PombePD*, *WormPD*, and *MycopathPD*. A tutorial is available from the site's main page to introduce new users to the resource. Users must register for and access the **BioKnowledge Library** from NIH or NCI-Frederick computers as access is controlled by IP address. To register, visit Incyte's Web site at <https://www.incyte.com/proteome/mainmenu.jsp> then click on the "Register" icon. Access the **BioKnowledge Library** from the above URL or from the Library's Home Page under "Electronic Resources," "Databases."

EFACTS DRUGS DATABASE, the online edition of **Drug Facts and Comparisons**, is now available courtesy of the NIH Libraries Consortium to NCI-Frederick researchers. The database also includes sections on Nonprescription Drugs, Drug Interaction Facts, Herbal Interaction Facts, Review of Natural Products, Med Facts: Patient Info and other features. The license restricts access to only 3 concurrent users so please be sure to logout once you finish your session. Access the database directly at the URL <http://www.efactsweb.com/index.asp> or on the Library's Home Page under "Electronic Resources," "Databases."

GUIDE TO THE SUCCESSFUL THESIS AND DISSERTATION : A HANDBOOK FOR STUDENTS AND FACULTY / JAMES E. MAUCH, NAMGI PARK. 5th ed. New York : M. Dekker, c2003. Books in library and information science ; v.62. WZ 345 .M377 2003

SCIENCE AND TECHNICAL WRITING : A MANUAL OF STYLE / PHILIP RUBENS, GENERAL EDITOR. 2nd ed. New York : Routledge, 2001. WZ 345 .S416 2001

RETRACTIONS OF PUBLICATIONS

The staff of the Scientific Library provides this service to alert our readers to any journal articles that are being retracted by the authors. Often, research that is undertaken to support the ideas in journal articles is questioned by other scientists. If the original authors then publish a formal retraction of all or parts of the original article, MEDLINE indexes that new article as “RETRACTION OF PUBLICATION” in the “publications type” field.

When a new retraction appears in MEDLINE, and subsequently in our newsletter, staff members type alerts that are permanently attached to the original articles. In this way, if a scientist is reading the original article, he/she will immediately be aware of the published retraction, and will be able to easily locate it in the journal collection.

1: Zonia L, Feijo J

State and spectral properties of chloride oscillations in pollen

ORIGINAL ARTICLE: Zonia L, Feijó J. *Biophys J.* 2003 Dec;84(2):1387-1398

RETRACTED IN: *Biophys J.* 2003 Dec;85(6):3425

PMID: 14645037

2: [No authors listed]

Retraction. Abstract 1785

ORIGINAL ARTICLE: Diamond, SM, Garlitz, C, Hubosky, C, Shenot, P, Halpern, E. *J Urol.* 2003 April;169(4 Suppl.):476, abstract 1785

RETRACTED IN: *J Urol.* 2003 Dec;170(6 Pt 1):2394

PMID: 14649221

What is LION?

LION, the NCI Office of Communications Library Online, is a repository and alerting service for NCI electronic resources, books, journals, NCI archival materials, and Internet links and content.

LION is an internal service for the use of NCI staff. LION's goals are to:

- collect and organize information resources of use and interest to the staff of the National Cancer Institute
- make those resources as widely accessible within NCI as possible
- personalize information delivery, so NCI staff can easily get the information they need

What content is available?

LION is the online evolution of the NCI Office of Communications Library, and its collection of over 60,000 items. The LION staff strives to collect and make available content not easily found in other services and libraries, and content tailored to the needs of our clients.

LION's unique content includes NCI internal and archival documents, NCI publications, the complete run of *The Cancer Letter* from 1973-present, and a wide range of captured electronic information that would become difficult or impossible to locate over time. LION also hosts *NCI Cancer Content*, a repository of cleared information for use in documents, speeches, and inquiries.

LION's content is tailored to NCI's needs through careful selection by the LION staff, and is customized further through participatory collection building, where LION users contribute information and ideas to improve the collection.

How do I get started with LION?

It's easy. Just open your web browser and go to the LION site at:

<https://lion.nci.nih.gov/>.

Once you are there, you can use all of LION's standard functions and services:

- Search and browse the collection
- Download full-text items
- Request services from LION staff
- View online help
- Link to other online information resources

For information on accessing LION's additional services for registered users, see "How do I personalize LION?" on the back.

Provided by the
Communication Services Branch
Office of Communications
National Cancer Institute

On the internal web at:
<https://lion.nci.nih.gov/>

Email us at:
nci-lion@mail.nih.gov or
NCI LION on the global directory

LION Staff:
Judy Grosberg, x66756, grosberj@mail.nih.gov
Kevin Broun, x22271, kbroun@nih.gov

What else can I do with LION?

Beyond the services available to anyone accessing LION, registered users gain access to additional, personalized services:

- **topic profiles**, so you can receive an email notice when new items of interest are added to LION
- **subscriptions**, so you can be notified when new issues of *The Cancer Letter*, *NCI Current Clips*, *NCI Cancer Content*, and other publications in the future, are added
- **saved items and searches**, so you can keep a personalized notebook of useful information and strategies, and even divide it into your own personal set of categories.

See "How do I personalize LION" for details on registering to access these value-added services.

What are the system requirements?

Since LION is a service for NCI staff, you will need a connection to the NIH intranet, either on the internal network or by Parachute dial-up. Your system must be configured for Internet access, with a web browser such as Internet Explorer, Netscape, or Mozilla.

To view many of LION's full text documents, you will need Adobe Acrobat Reader, available for free from Adobe at <http://www.adobe.com/>.

To sign in and use LION's personalized services, you will need to register using an *nih.gov* email address, and your browser must accept cookies.

How do I personalize LION?

To use LION's personalized services, first become a registered user. You'll need to fill out a brief online form and then receive your sign-in information in an email. On the web:

- 1) Go to LION at <https://lion.nci.nih.gov/>
- 2) Choose "Register" in the top menu
- 3) Fill out your information and submit
 - be sure to use an *.nih.gov* email address
 - check the boxes to subscribe to email alerts
- 4) Check your email for a message (it may take a minute or two to arrive) – it will contain your new LION password
- 5) Return to the LION site and sign in with your email and assigned password

Once you are signed in, you'll see three new options in the top menu.

Select **Profile** to:

- Set up topic notices, where LION will send you an email when new items are added that fit your profile
- Update your subscriptions to email alerts about new issues of *The Cancer Letter*, *NCI Current Clips*, and *NCI Cancer Content*

Use the **Notebook** to:

- Keep a personal list of items and search strategies that you may want to use again
- Organize your items and searches into folders based on projects, topics, etc.
- Review requests you've submitted

Select **Preferences** to:

- Change your password
- Update your personal information
