Monday - Thursday
8:30AM - 9:00PM

Friday
8:30AM - 7:00PM

Saturday
10:00AM - 5:00PM

Sunday
11:00AM - 5:00pm

Welcome, Cindy Shank, Library Intern!

The Scientific Library is excited to have an intern with us during the summer months. Cindy Shank, a graduate student in the Library and Information Management program at the University of Alabama, will be with us in May and June. Cindy will spend a total of one hundred hours with us working on various projects and talking with the Library's staff to learn more about what they do to keep the Library running.

Cindy is originally from Gettysburg and has also lived in western Pennsylvania and Middletown,

Maryland and now resides in Hagerstown. She has undergraduate and graduate degrees from Hood College in English and Administration and Management respectively. She would like to enter the library field because it "...is an exciting field to get into now with the digitization, archiving, web 2.0, and the other technology that is being added." She chose the Scientific Library as the site for her internship because she has "...heard good things about the Library over the last 25 years." It is also conveniently located near her full-time job as a Software Test/Validation Engineer at Fort Detrick.

After earning her degree, Cindy hopes to find a job in a government or academic library that would allow her to combine her skills gained during thirty years of work in the software industry with her new knowledge of library service. She still has hopes of landing her perfect job, working at the Motion Picture Academy Library, which would allow her to use her love of classic films. This is a life-long wish, as she won a school essay contest just last year in which she described a day in her dream job.

We are pleased to have Cindy with us and hope that her experience at the Scientific Library lives up to its reputation.

Journal/Author Name Estimator (JANE)

If you are looking for the perfect journal in which to publish your research, there is a free resource tool, **Journal/Author Name Estimator (JANE)**, that might help you. You can copy and paste your manuscript's abstract or type in the key concepts of your paper, click the Find Journals button, and get a list of journals, sorted by confidence score. To learn more about **JANE**, visit The Biosemantics Group website at <http://www.biosemantics.org/jane/faq.php>.

Free Training Classes When and Where You Need Them

Along with the warmer weather in May, the Scientific Library brings you a new training class, WHO IS CITING YOU? Focusing on **Web of Science** and **Scopus**, this class will go over the search process used to determine how many times an article or author has been cited and who has cited a particular article.

We also offer assistance with other resources. Call on us if you need help improving your search results or organizing your citations. We can also schedule group sessions. Visit our list of classes at <http://www-library.ncifcrf.gov/libclass.aspx> and request a session. We can tailor any of our classes to meet your needs! In addition, if there are any classes you would like to see offered in the future, please let us know!

CHI Spotlight

The **Center for Health Information (CHI)** in the Scientific Library is undergoing a facelift. We are changing and rearranging to improve this area. We thank you for bearing with us while these changes are completed.

Looking for Scientific Library Events?

Go to the Library's Homepage at

<http://www-library.ncifcrf.gov>

and look under the **News and Events** column

(the right side column) for upcoming events.

Library Orientations

Upcoming Library Orientations will be held on the following dates and times:

Wednesday, May 12, 2:30 p.m.

Wednesday, June 9, 2:30 p.m.

The 60-minute orientations, which are held in the Library's Technology Training Lab in Building 549, require no registration.

We encourage all new (and not-so-new) employees to attend a SCIENTIFIC LIBRARY ORIENTATION to learn about the many services and resources offered by the Library. If you are unable to attend these sessions, please call x5846, or email brandenburgm@mail.nih.gov, to schedule an alternate session.

In addition, several SCIENTIFIC LIBRARY STUDENT ORIENTATION sessions will be scheduled for June.

Featured Website

Clinical Reader

<http://clinicalreader.com/cr/about/>

The mission of the developers of the research tool, **Clinical Reader**, is to enable medical professionals around the world to focus their time, discover new links, and fine-tune their online experience in a bid to effectively manage online clinical browsing. Developed by a UK physician at the NHS Foundation Trust, London, **Clinical Reader** aims to ease information delivery to the medical community by offering a collection of accessible clinical, scientific and health literature resources.

A digital medical library, **Clinical Reader** offers regularly updated content and features recent articles from high impact factor and popular journals, health news sources and prime multimedia content. Headlines are visualized and seamlessly linked to abstract or full content articles to highlight current research, trends and analysis.

Book Club Topics Selected for Second Half of 2010

The **Reading Diversions Book Club** has chosen topics for the remainder of the year. We have some thought-provoking discussions planned for books on Leonardo da Vinci, Henrietta Lacks, the environment, fetal alcohol syndrome, breast cancer, and *The Best American Science and Nature Writing 2009*. We welcome you to bring your lunch and your opinions to our informal, midday gatherings. Please visit the Book Club's website at <http://www-library.ncifcrf.gov/bookclub.aspx> for details about meeting dates and book selections. Please call x1093 or email NCIFredLibrary@mail.nih.gov to join the **Reading Diversions Book Club** email list or if you would like to borrow copies of our upcoming titles.

Science in the Cinema on Cancer Research

May is designated as **National Cancer Research Month**, so the Scientific Library is offering a relevant **Science in the Cinema** for May. On Wednesday, May 12 and again on Friday, May 14, we will show the movie *Living Proof*. This 2008 Lifetime Channel movie stars Harry Connick Jr. as Dr. Dennis Slamon, the developer of the revolutionary cancer drug Herceptin. This gut-wrenching true story explores one doctor's difficult struggle to find a cancer treatment that can save thousands of lives while giving meaning to his own life.

On Thursday, May 20, we will host a panel discussion in the Auditorium of Building 549 beginning at 2:00 p.m. The panel will consist of NCI-Frederick researchers, who will discuss the history of cancer research here at NCI-Frederick as they have lived it. Audience members will also have a chance to participate in this historical walk down memory lane. We encourage you to mark your calendars now for this unusual and informative event. Complete information may be found on the **Science in the Cinema** webpage at <http://www-library.ncifcrf.gov/science-cinema.aspx>.

Upcoming Summer Events

The Scientific Library staff is busy planning our summer activities. So far on the schedule are the following events. In June we will offer a number of **Student Orientations** for all the high school and college students on campus for the summer. Also in June we will begin our **Summer Video Program**. This year each Monday through August we will show episodes of the acclaimed Discovery Channel series *Life*. July will find us hosting children for **Take Your Child to Work Day** and our **2nd Annual Children's Book Swap**. Also in July will be our **4th Annual Student Science Jeopardy Tournament**, where teams of high school and college students will go head to head to answer science questions in the traditional answer/question Jeopardy format. Throughout the summer and into the fall the Scientific Library staff will host a monthly table at the **Farmers Market** outside Building 549. **Training classes** will also be offered during the summer months. The staff invites you to participate in as many of our summer programs as you can. Complete information can always be found on the Library's website at <http://www-library.ncifcrf.gov>.

Resource of the Month: bioDBnet

The Scientific Library's **Resource of the Month** for May is **bioDBnet**, a database developed by ABCC here at NCI-Frederick. Integrating many public databases, this resource provides tools for getting detailed annotation reports and to convert between biological identifiers. This easy to use database is worth checking out! You can access **bioDBnet** from the Library's Databases page:

<http://www-library.ncifcrf.gov/databases.aspx>

If you would like to request an individual or group session to learn more about **bioDBnet**, please contact Marci Brandenburg at x5846 or brandenburgm@mail.nih.gov.

National Library Week Recap

The Scientific Library would like to thank everyone who helped make this year's **National Library Week** a success. More than 60 people attended our **Open House**, where we gave away over 20 books, donated by library staff, in our **Book Lover's Raffle**. Some of you returned later in the week to watch the fun, book-loving movie ***Inkheart***. We were very happy with the participation in this year's events, and we're hoping to capture the magic again next year.
