

Status Update- 9/4/13

On August 15, 2013 the RFI was sent to a targeted list of vendors as well as posted on the Fort Detrick Business Development Office (FDBO) website. Our project team has been contacted by approximately six vendors who have shown interest in our project. Several of these vendors have asked follow up questions. Due to the number of questions that have been asked, a document capturing all of the questions and their answers has been developed and posted as an amendment to the RFI. Those vendors who were sent the RFI directly have also been sent the amendment as well. Responses to the RFI are due on September 15, 2013. Due to the interest already generated, our project team expects to receive several responses. Once the all of the responses have been received, the project team will evaluate them and make recommendations to the steering committee.

If you have any questions please do not hesitate to contact Jim Racheff or Jerry Burge. Thank you!
