Setting Up Speed Dials and Call Forwarding Using the Cisco Self Care Portal
If you have questions or problems with this process, such as your logon not working, or your phone not being listed once you have logged in, please contact the NCI at Frederick Computer Helpdesk at x5115 and open a ticket regarding the Cisco Phone Self Care Portal. The Helpdesk will forward this ticket to the Network and Telecommunications Group, and a member of this group will contact you.
Logging In to the Cisco Self Care Portal

Point your browser to https://ciscovoip/ucmuser (users on the NIAID network will need to use the full domain name: https://ciscovoip.ncifcrf.gov/ucmuser)

You may receive a security alert because the security certificate we are currently using is “self-signed” as depicted below for 3 popular browsers (Firefox, Internet Explorer, and Chrome.) If you receive one of these error screens the appendices at the end of this document details the process to accept the “self-signed” certificate that the VoIP server is currently using.

If you have questions or problems with this process, such as your logon not working, or your phone not being listed once you have logged in, please contact the NCI at Frederick Computer Helpdesk at x5115 and open a ticket regarding the Cisco Phone Self Care Portal. The Helpdesk will forward this ticket to the Network and Telecommuncations Group, and a member of this group will contact you.

The Helpdesk will forward this ticket to the Network and Telecommunications Group, and a member of this group will contact you.
Using the Speed dial on your phone

Once the number is saved you can dial it from your phone by pressing the speed dial number you assigned (2 in the example above) and then the AbbrDial softkey that will appear at the bottom of the screen once you start entering a number.

Your phone must be inactive (no dial tone) in order for the AbbrDial button to appear. You can either place the call with the phone hung up, which will place the call on the speaker phone initially and then pick up the handset if you don’t want the call to be on speaker phone; or you can pick up the handset and press the “End Call” softkey prior to pressing the speed dial number, and the AbbrDial softkey which will place the call on the handset.

If you have questions or problems with this process, such as your logon not working, or your phone not being listed once you have logged in, please contact the NCI at Frederick Computer Helpdesk at x5115 and open a ticket regarding the Cisco Phone Self Care Portal. The Helpdesk will forward this ticket to the Network and Telecommunications Group, and a member of this group will contact you.
Configuring Call Forwarding using the Self Care Portal

Click the “Call Forwarding” Link on the left side of the window

If you have questions or problems with this process, such as your logon not working, or your phone not being listed once you have logged in, please contact the NCI at Frederick Computer Helpdesk at x5115 and open a ticket regarding the Cisco Phone Self Care Portal. The Helpdesk will forward this ticket to the Network and Telecommunications Group, and a member of this group will contact you.
