QUOTE OF THE MONTH

**I have always imagined that
paradise will be a kind of library.**

~Jorge Luis Borges~

LIBRARY ORIENTATIONS

Upcoming Library Orientations will be held on the following dates. June’s Orientation will be held on **Tuesday, June 8**, and July’s Orientation will be held on **Wednesday, July 14**. Both Orientations will **begin at 2:30 pm**. Orientations, which are held in the Library’s Microcomputer Lab, require no registration.

We encourage all new employees to attend a Scientific Library Orientation to learn more about the Library's services, and to see demonstrations of the Library's Home Page and online catalog. If you are unable to attend any of these sessions, please call x5840 to schedule an alternate session.

Special **Student Orientations** will be held in June. Please see a brief article elsewhere in this newsletter for more information.

INSTRUCTIONAL TRAINING CLASSES

The Library’s **FREE** hands-on computer classes have ended for this semester. Classes will begin again in the fall. To see a complete list of classes with descriptions, please check our web site at URL <http://www-library.ncifcrf.gov/libclass.asp>

For individual instruction on searching many of our databases, please check our **Web Tutorials**. For complete information, please see the web page at URL <http://www-library.ncifcrf.gov/webtraining1.asp>

NATIONAL LIBRARY WEEK

The Library observed National Library Week April 18-24. We broke our “No Food or Drink” policy and offered refreshments to all visitors. The event was somewhat low-key due to budget limitations; however the staff of the Library would like to thank all who helped us celebrate National Library Week this year.

STUDENT ORIENTATIONS

If you have high school and college students working in your lab this summer, you will probably send them to the Scientific Library at some point during their time here. You may want them to photocopy journal articles, or perform computer searches, or locate relevant books.

Before you send them to us for those activities, plan to send them to us for a Student Orientation. A Student Orientation provides a tour of the Library, instructions on searching the Online Catalog, demonstration of and practice with the Library’s web site, and guidance in locating journal articles to photocopy or print.

Four identical sessions are scheduled on different days at different times to accommodate a variety of schedules. Each Student Orientation is approximately 1 hour in length. Here is the Student Orientation Schedule for 2004:

- SESSION 1: Wednesday, June 23 – 2:30 p.m.
- SESSION 2: Friday, June 25 – 10:00 a.m.
- SESSION 3: Tuesday, June 29 – 2:30 p.m.
- SESSION 4: Wednesday, June 30 – 10:00 a.m.

REGISTRATION IS REQUIRED. To register your student, please call x5840, or email meckley@mail.ncifcrf.gov. Remember to designate a specific date and time. If your student is unable to attend any of these sessions, please call x5840 to schedule a one-on-one Orientation session.

“WEB CITATION INDEX” FROM ISI IN DEVELOPMENT

Thomson ISI, producer of databases such as **Web of Science**, and NEC Laboratories America (NEC) announced their collaboration to create a comprehensive, multidisciplinary citation index for Web-based scholarly resources. The new database will track online-only citations of scholarly writing as well as references in printed material to online-only sources. Though the new index will be maintained separately from ISI's other databases, it is thought by some that the new index is likely to encourage scholars to publish online or to use preprint servers. During 2004, Thomson ISI and NEC will operate a pilot of the new resource to receive feedback from the scientific and scholarly community. Full access to the index is projected for early 2005. For more details, visit ISI's web site at the URL <http://www.isinet.com/press/2004/8217120>.

RSC JOURNAL ARCHIVES NOW AVAILABLE

NCI-Frederick chemists will be pleased to learn that the Library recently purchased access to the **Royal Society of Chemistry (RSC) Journal Archives (1841-1996)** for NCI-Frederick employees. When you access any of the Library's subscribed RSC journal titles from the Library's Online Journals list, full-text access in PDF format is now available from the start date of the journal. For titles the Library does not own in print, the links can also be found in the Online Journals list, with available years listed. Subscribed titles include **The Analyst, Chemical Communications, Natural Product Reports, Organic & Biomolecular Chemistry (formerly Perkin 1 & 2)** as well as the databases **Analytical Abstracts, Methods in Organic Synthesis, and Natural Product Updates**. For more details, visit the RSC Archives web site at the URL <http://www.rsc.org/is/journals/retrodigitisation.htm>

This journal publisher archives joins the **American Chemical Society Journal Archives**, which the Library began a subscription to in 2003.

SITES FROM THE WEB

The following selected sites have come to our attention via various sources; their inclusion on our Web site does not indicate endorsement by Library staff. Links to these sites can be found under “Web Resources” in the **Electronic Resources** section of our web site under the category noted in each listing. Visit the Library’s Home Page at <http://www-library.ncifcrf.gov>.

Biological Journal Abbreviations

<http://home.ncifcrf.gov/research/bja>

Used by scientists around the globe to assist them with their publishing needs, this useful site is maintained and edited by NCI-Frederick researcher Geoffrey Patton, PhD. You will find abbreviations, full titles, and links to Web pages for a large variety of biological and medical journals. The editor encourages contributions to the list. You may email him at gpatton@ncifcrf.gov with information to include the Journal's full title, an accepted abbreviation, the city of publication, and the address of an existing website hosting an online version of journal or information about the journal. The British Library’s “Turning the Pages” Project

<http://www.bl.uk/collections/treasures/digitisation.html>

From the **British Library’s** recently released web site, you can “Turn” the pages of world cultures, science, and history. The British Library has made available ten items from its unique interactive display system including **Leonardo da Vinci’s Notebook, c1508**, **Elizabeth Blackwell’s A Curious Herbal, 1737**, and **Andreas Vesalius’ De Humani Corporis Fabrica (On the Fabric of the Human Body), 1543**, a rare sixteenth century treatise on anatomy. Anyone in the world with access to the Internet can “turn” the pages of electronic images from these items in the Library’s collection similar to the way visitors to the Library’s Exhibition Galleries in London, can touch the computer screen and “turn” images from these works. Also required are Macromedia Flash and Internet Explorer. [*Scientific/Research*]

“Making the Right Moves: A Practical Guide to Scientific Management for Postdocs and New Faculty”

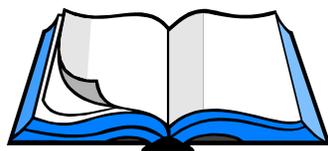

<http://www.hhmi.org/grants/office/pdfs/book.pdf>

Based on presentations and discussions from a course developed by Howard Hughes Medical Institute and the Burroughs Wellcome Fund, this free online book is a collection of practical advice, experiences, and opinions from seasoned biomedical investigators and other professionals. “Electronic, Scientific, Technical, and Medical Journal Publishing and its Implications: Report of a Symposium”

<http://www.nap.edu/books/0309091616/html/>

This is a Symposium Report from a collaboration of the National Research Council, the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine. Their charge was to determine the far-reaching implications of the changes in production, management, publication, dissemination and use of scientific, technical and medical research. RETRACTIONS OF PUBLICATIONS

The staff of the Scientific Library provides this service to alert our readers to any journal articles that are being retracted by the authors. Often, research that is undertaken to support the ideas in journal articles is questioned by other scientists. If the original authors then publish a formal retraction of all or parts of the original article, **MEDLINE** indexes that new article as "RETRACTION OF PUBLICATION" in the "publications type" field.

When a new retraction appears in **MEDLINE**, and subsequently in our newsletter, staff members type alerts that are permanently attached to the original articles. In this way, if a scientist is reading the original article, he/she will immediately be aware of the published retraction, and will be able to easily locate it in the journal collection.
